CUMULATIVE EDITORIAL INDEX

Including July 1962 through December 1962. Number preceding hyphen is month of issue; those following are page numbers.
AUTOMATION *is indexed in the Applied Science & Technology Index and the Engineering Index, available in libraries generally.*
Microfilm copies are available from University Microfilms, 313 N. First St., Ann Arbor, Mich.

A

Adams, E. N.
Practicality of Cryotrons, 11-158
Adjustable speed drives, 9-62
Administration wage and salary, 11-164*
Aligning, moving webs on rolls, 9-73
Alignment, of moving webs, 8-68
Applied Research, 7-132*
Assemble feed bowl, 7-76
Assembly, 10-39
circuit cards, 10-13*
generator commutators, 12-58
indexing machines, 8-77
printed circuit, 9-18*
small electron tubes, 10-62
transfer devices, 12-61
with vibratory feeders, 11-97; 12-79
Automation,
in Europe, 9-41
and maintenance, 12-50
philosophy, 8-153; 10-157; 11-163*
policies for, 7-50
predicted trends, 9-52
technological change, 11-165*
warehousing, 11-159

B

Berman, H.
Using Critical Path Programming, 11-90
Billet
handling, 11-96
inspection, 11-96
Blow molding, 7-60
Bode plot, 7-86
Bolz, R. W.
Automation Outlook, 12-9*
Developing Policies for Automation, 7-50
Brazing, 10-62
Broaching machine, 8-82*
Buffer storage unit, relay, 8-14*
Burgess, W. C., Jr.
Handling with Vibration, 7-76

C

Cartons, gluing, 8-83*
Caustic soda, production, 11-76
Centering, moving webs, 8-68; 9-73
Centrifugal extractor, 8-24*
Ceramic material, 9-22*
Checkweighing, 9-85
Clarridge, R. E.
Selecting Pressure Transducers for Pilot Plant Operations, 10-82
Classification, drill units, 10-72
Cleaning,
drum separator, 12-16*
press plates, prob., 12-150*
radiator headers, prob., 12-150*
around spinning frames, 8-56
Coating gun, 8-18*
Cold heading material, prob., 7-138*
Coleman, W. E.
Instrumentation Responsibility, 7-129
Computer-controlled marking station, 9-67
Computers,
analog, 8-4*; 12-141
in data collection system, 8-61
Control,
computer, 12-43*
of loading by weight, 10-88
of package filler, 9-85
photoelectric, 8-157*
system, cash and inventory, 7-16*
system for pipeline, 8-14*
system, quality, 9-26*
systems, dynamics of, 11-164*
systems, nonlinear feedback, 11-165*
terminology, 7-84
theory, 7-84
Controls,
adjustable function generator, 8-66
analog computer, 12-141
consistency, 7-83
conveyor, 9-82
for cranes, hoists, 12-22*
digital speed, 9-62
electronic, 7-134*
feed, 8-16*
forging machine, 8-85
gain margin, 7-88
gain ratio, 7-84
liquid level, 9-72
magnitude ratio, 7-84
moisture, 7-83
noncontacting switches, 11-79
numerical, 11-62
numerical for French jig bore, 10-45
overhead location, 9-35
phase margin, 7-88
pressure, 12-77
radiation gaging, 9-72
servo-controlled marking machine, 9-67
speed, 9-62
standards, 11-31
strain gages, 11-85
system stability, 7-87
system theory, 10-162*; 11-163*
ultrasonic pipe inspection, 9-127
vibratory feeder, 11-97
x-ray level detecting, 6-77
Conveyors, 8-68
coil handling, 9-66
dispatching system for, 9-82
packaged brick system, 12-57
Counting, to control weight fill, 9-85
Critical path method, 11-90

D

Damewood, G.
Ultrasonic Inspection Techniques, 9-127
Data processing, 7-132*; 12-37
analog computer, 8-4*
anticipator-computer control system, 11-16*
buffer storage unit, 8-14*
computer memory elements, 11-13*
computer recorder, 10-26*
control system, 8-14*
digital data system, 11-17*
drafting machine, 8-55
electronic computer, 8-13*
electronic data recorder, 9-24*
electronic system for stock quotations, 8-4*
electronic unit, 10-18*
English steel plant, 12-43*
information theory, 10-164*
magnetic memory disc, 12-33*
magnetic tape input equipment, 8-16*
magnetic tape testing, 10-16*
measuring machine, 8-19*
in missile testing, 12-68
office reporting, 8-61
principles of punched card, 11-165*
printer, 10-20*
punched card systems, 8-157*
scanning machine, 9-16*
shop reporting, 8-61
tape perforator, 8-17*
track protector, 12-27*
Decorating, hotel dishware, 6-63
Depreciation, tax procedures, 9-35
Design,
for automated assembly, 10-62
features, transfer machines, 7-37
transfer machine, 10-89
Detecting,
holes in metal strips, 12-14*
pipe defects, 9-127
Dickson, Tracy
Selecting Strain Transducers, 11-85
Diesel generating unit, 8-26*
Diffusion bonding, 8-50
Digital speed controls, 9-62
Dispatching,
on conveyors, 7-56; 9-82
system for conveyors, 8-14*
Doffing spinning frames, 8-56
Drift, lateral, of moving webs, 8-68
Drill units,
manufacturers of, 10-72
self-contained, 10-72
Drive system, mine hoist, 8-16*
Drives, bearing, contact roll, 12-30*
Dryers, drum, 7-14*

E

Edge guidance, 8-68
Education services for conveyor users, 11-14*
Electrical
discharge machining, 11-156
standards, 11-31
Electrolytic machining, 11-155
Electromechanical, energy conversion, 10-164*
Electron beam welding, 8-50; 11-156
Electronic inventory control system, 7-16*
Electronics,
encyclopedia of, 11-164*
Engineering, legal aspects, 8-157*
European developments, 9-41
Ewald, R. W.
Self-Contained Automatic Drill Units—Should You Do It Yourself?, 10-76
Expediting, minimum cost, 11-90
Extractor, centrifugal, 8-24*
Extrusion,
blow molding, 7-60
puller, 12-14*

F

Fabrication, aerospace structures, 8-50
Faulkner, W. H., Jr.
Thickness Measuring Devices, 7-67
Faw, J. E., Jr.
Automation in Baking Industry, 7-127
Feed control unit, 8-16*
Feeders, vibratory, 7-76; 9-28*; 11-97; 12-79
Feeding,
and filling bags, prob., 8-162*
granulated materials, 12-43*
ground coffee, 9-59
parts to dial machines, 8-77; 10-62
Filling,
collapsible tubes, 7-75
by weight, 9-85
Finishing,
coating gun, 8-18*
spray gun, 8-4*
Flow measurement, Polish, 11-37*
Foreign trade, 8-43
Forging machine, 8-85
Forming,
high velocity processes, 8-149
horizontal forging, 8-85
Friction welding, 8-37
Function generator, 8-66

G

Gage,
magnetic comparator-type, prob., 8-162*
x-ray, 9-20*
Gaging,
nuclear, 10-70
radiation, 7-67; 9-72
thickness, 7-67
Generating unit, 8-26*
Giulie, J. D.
Counting to Control Weight Fill, 9-85
Grinding, double disc, 7-29*
Grinding insert cutter, prob., 10-168*
Gunkel, W. A.
Ultrasonic Inspection Techniques, 9-127

H

Handling,
for assembly, 8-77; 10-62
bobbins, 8-56
cartons, 11-84
coils of strip, 9-66
commutator components, 12-58
conveyor equipment, 11-14*
dispatch system, 8-14*
extrusion puller, 12-14*
lime, 11-76
newspapers, 12-34*
order-picking, 11-159
packaged bricks, 12-57
parcel sorting, 12-22*
pellets into cars, 10-88
port protectors for air vibrators, 6-16*
programmed die feed, 8-85
prototype pallet, 8-21*
for rolling mills, 9-66
on rolls, 8-68
slugs in furnace, 6-62
strapping cycle for pallet load, 11-28*
transfer devices, 12-61
typewriter parts, 7-56
using rolls or pulleys, 9-73
vertical lift, 7-56
vibratory, 7-76
vibratory feeder, 9-28*; 11-97; 12-79
Hardenburgh, M. R.
Automated Missile Testing, 12-68
Hardening, 8-37
